✚ employment

Thales Group
Software Engineer [intern] RnD

Irvine, CA
Jun 2014 to Current

- Worked with a small team of 6 to rapidly prototype and test new ideas, and integrate successful ones into existing hardware.
- Implemented an entire tile based interface using HTML5/CSS3/JS + jQuery, and integrated it into existing seat hardware.
- Rewrote and added new features to Android sidearm interface.
- Worked with teammates to modify and integrate existing C++ eye-tracking and gesture recognition (OpenNI) code into new interface utilizing WebSockets + Play Framework for communication.
- Updated, maintained, and added significant features to existing UI.

The Walt Disney Company
Valet Runner

Disneyland, Anaheim
2012 to 2014

✚ projects

Buttle
Desktop app to monitor ~/Downloads/ folder and actively sort downloads based on file extension. (Made with Python3 + Pync + wxWidgets)

Produce.me
Web app that takes a PLU code (from produce) and returns all relevant information about the fruit/vegetable along with top trending recipes involving that food item. (Made with Python/Django + Food2Fork API)

LegalEasy
Web app/service + Android app to help make legalese easier to read. (Made with Python/Django + Android)

stry
Web app to facilitate collaborative story writing, one line at a time. (Made with Python/Django + HTML/CSS/JS)

HiddenList
Small Django web app to allow anonymous users to create lists of bookmarks mapped to generated keys. (Made with Python/Django + HTML/CSS/JS + jQuery)
